# TOLL NQX BRISBANE

TOTAL COST \$270,000 TOTAL FIXTURES 407

LEDsafe was engaged to provide a solution to prevent continuous failures in the existing LED lighting present on site. After reviewing all aspects of the cause of the ongoing issues, electricity supply was not found to be the cause of failures and product design was possibly the contributing factor.

LEDsafe arranged for the supply and installation of a trusted solution which continues to perform to expectations. A 12 month review has confirmed zero failures with the LEDsafe solution.

## OUTCOMES

- Replacement of faulty LED lighting.
- Completed power quality test confirmed no supply issues.
- 12 month review confirmed solution provided by LEDsafe has seen no failures.
- Total cost: \$270,000

## KEY FACTORS

- Assess current site issues.
- Identify existing LED manufacturers/ due diligence on product used.
- Engage with stakeholders re: history of issues with existing lighting.
- Undertake a power quality test to ensure supply conditions.
- Use the same infrastructure and install new LED lights to high risk areas following a walk through with onsite toll team.

LEDsafe addressed this significantly challenging situation in a professional and impressive manner. The ability to mobilise and fix the issue quickly was very much appreciated.
